

CXPOINT CLIENT APPLICATION USER HELP GUIDE

Submitted by CXPoint

Version: 1.0

Release date: Feb 2025

TABLE OF CONTENT

CXPoint Client Application User	6
1. Client User Login	6
1.1 How new user will set password and login for the first time in dashboard?	6
1.2 How does a registered user Login?	6
1.3 How Single Sign-on Works?	6
1.4 How to reset Forgot Password?	7
1.5 How to change region?	8
1.6 How to change organization?	9
Voyage User	9
1. How to save to workspace in Voyage?	9
2. Flow Summary & Flow discovery	12
3. Prompts & Transcribe (file meta data, application logic, scripts & variables)	14
4. How to upload from CSV files	15
5. Save flow & generate report	17
Nexa User	18
User Object	18
1. How to active and update users?	18
2. How to customize table?	19
3. How to use filter and search for user?	20
4. How to create users?	20
5. How to update users via CSV file?	21
6. How to create single user?	21
7. How to create multiple user?	21
8. How to upload file to update user details from workspace?	22
9. How to migrate user?	23
10. How to Inactive/Delete user?	23
Divisions object	25
1. How to create division?	25
2. How to active and update users?	26
3. How to update division details via CSV files?	26
4. How to create single division?	27
5. How to customize table in division?	27

6.	How to upload file to create divisions from workspace?	27
7.	How to inactive and delete divisions?	28
	Roles object	28
1.	How to active and update users?	28
2.	How to create single role?	29
3.	How to update users via CSV file?	29
4.	How to create multiple role?	30
5.	How to upload file to create roles from workspace?	31
6.	How to inactive and delete role?	31
	Queue object	31
1.	How to see active queue?	31
2.	How to create single queue?	32
3.	How to create multiple queue?	32
4.	How to upload file to create queues from workspace?	33
	Skills object	33
1.	How to create skill?	33
2.	How to active and update Skills?	33
3.	How to update skills via CSV files?	34
4.	How to create single skill?	34
5.	How to upload skills from workspace?	35
6.	How to migrate skills?	35
	Language object	35
1.	How to search Language?	35
	Call Routing object	36
1.	How to create users in call routing?	36
2.	How to create single call routing?	36
3.	How to active and update users in call routing?	36
4.	How to update users via CSV file?	37
5.	How to upload file to create call routing from workspace?	37
	Emergency Groups object	38
1.	How to create users in emergency group?	38
2.	How to create single emergency group?	38
3.	How to see active and update users in emergency group?	38

CXPoint Client Application User

1. Client User Login

1.1 How new user will set password and login for the first time in dashboard?

Step 1. Open the email containing the account setup link and click on it.

Step 2. Enter email and OTP. Then click on Change Password.

Step 3. Set new password and Confirm Password. Then click on Change Password.

Step 4. To login enter Email and Password.

Step 5. To Authenticate, download and use Microsoft Authenticator App and Scan the QR Code then choose Next.

Step 6. Enter one time Password Code then choose Next.

Step 7. Approve the notification we're sending to your app.

Step 8. Once the notification is approved you are authenticated.

[*Click here to go back to list of questions*](#)

1.2 How does a registered user Login?

Step 1. Registered user will open application.

Step 2. Enter your email and password then click on login.

Step 3. Approve notification or code on Authenticator app.

Step 4. Enter One Time Password Code and choose Submit.

[*To go back to list of questions click here*](#)

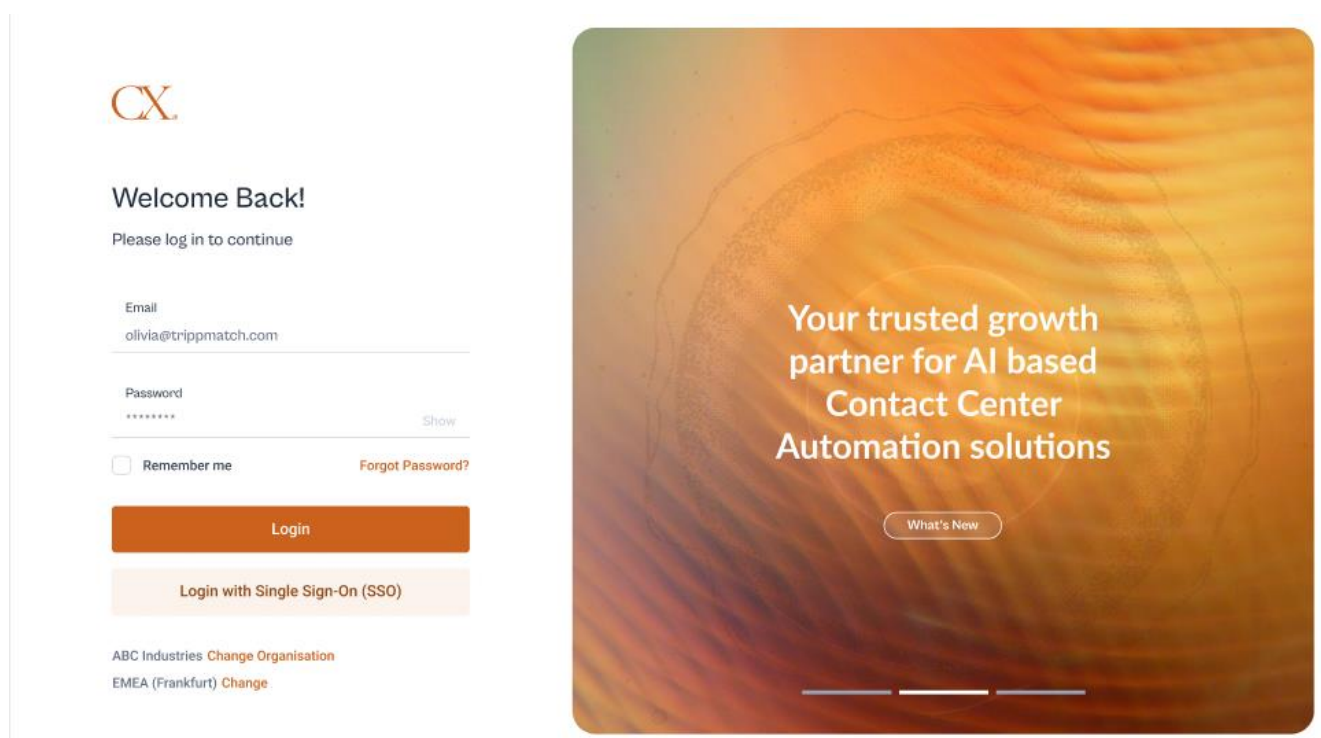

1.3 How Single Sign-on Works?

Step 1. Login with Single Sign-On (SSO)

Step 2. Enter your Single Sign-On email.

Step 3. Verification link will be sent to your email.

Step 4. Verify/Approve from your email.

[To go back to list of questions click here](#)

1.4 How to reset Forgot Password?

Step 1. Enter your email.

Step 2. Click on send OTP on Authenticator App.

Step 3. Enter and Verify code.

Step 4. Create new Password.

Step 5. Login with new Password.

Voyage User

1. How to save to workspace in Voyage?

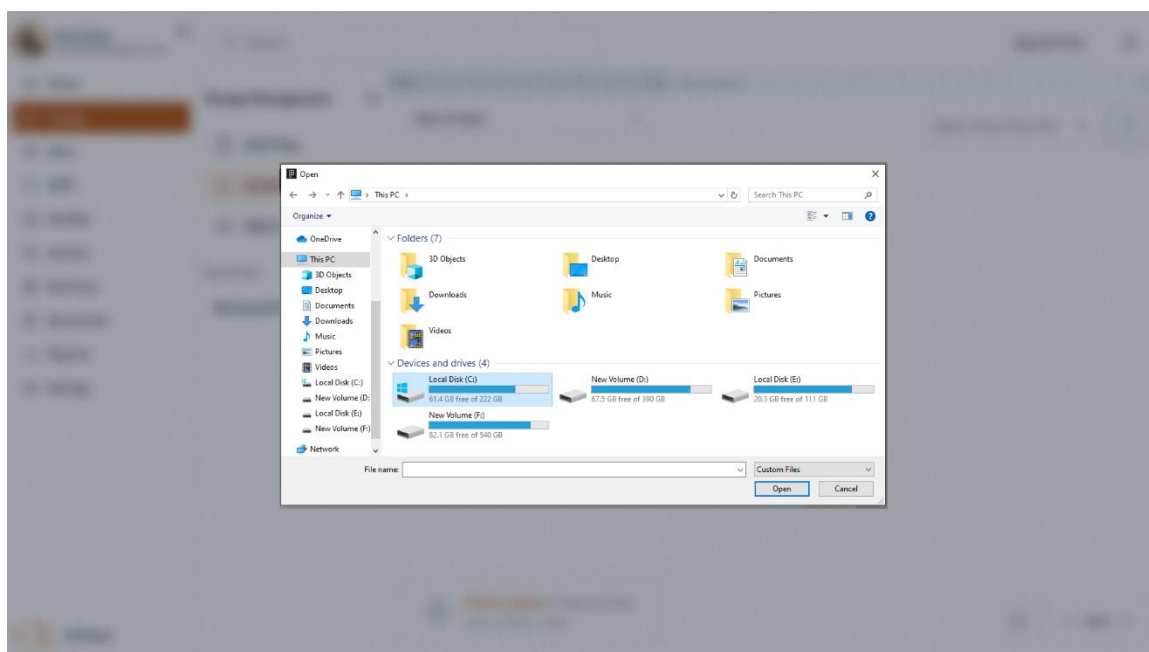

Step1. Go to Voyage page.

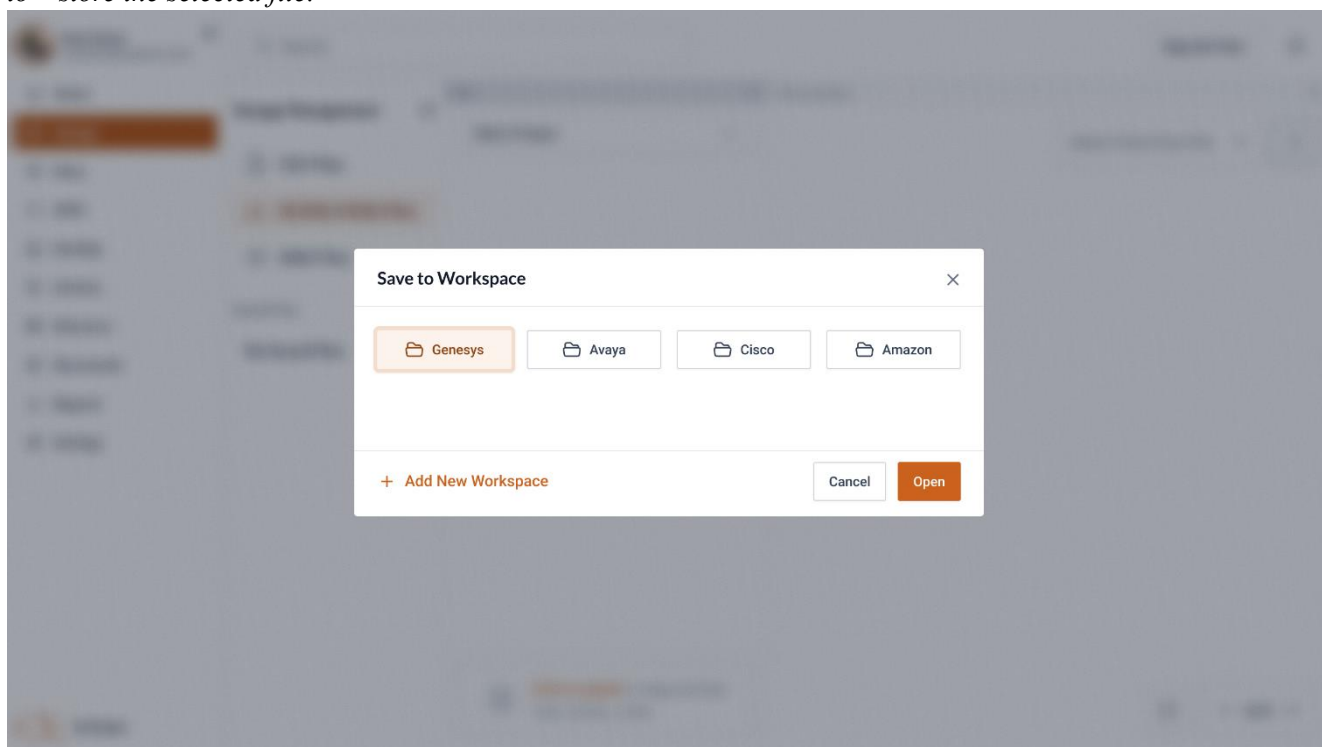

Step2. Go to Files Section & Click on “Click to Upload” option.

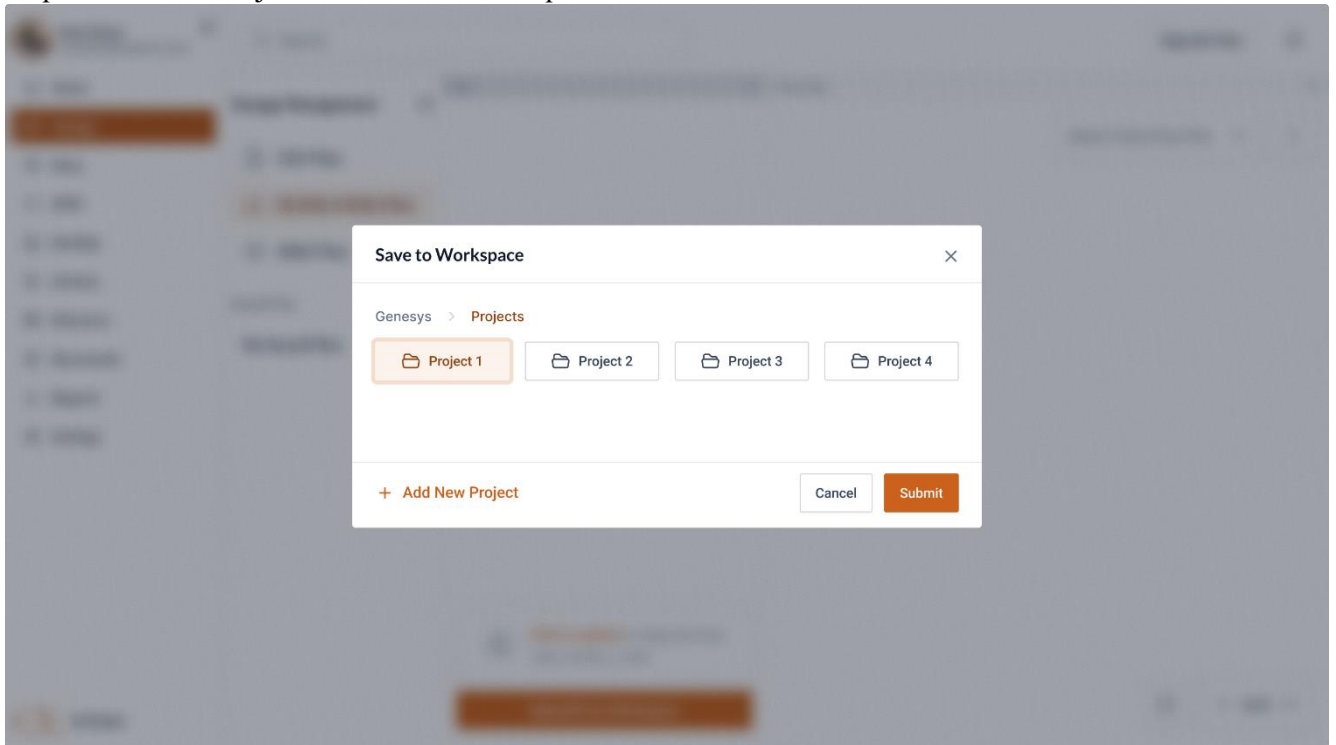

Step3. Select the File to be uploaded and click on “Open”.

Step 4. Select the Workspace or can create new workspace by clicking “Add new workspace” in which you wish to store the selected file.

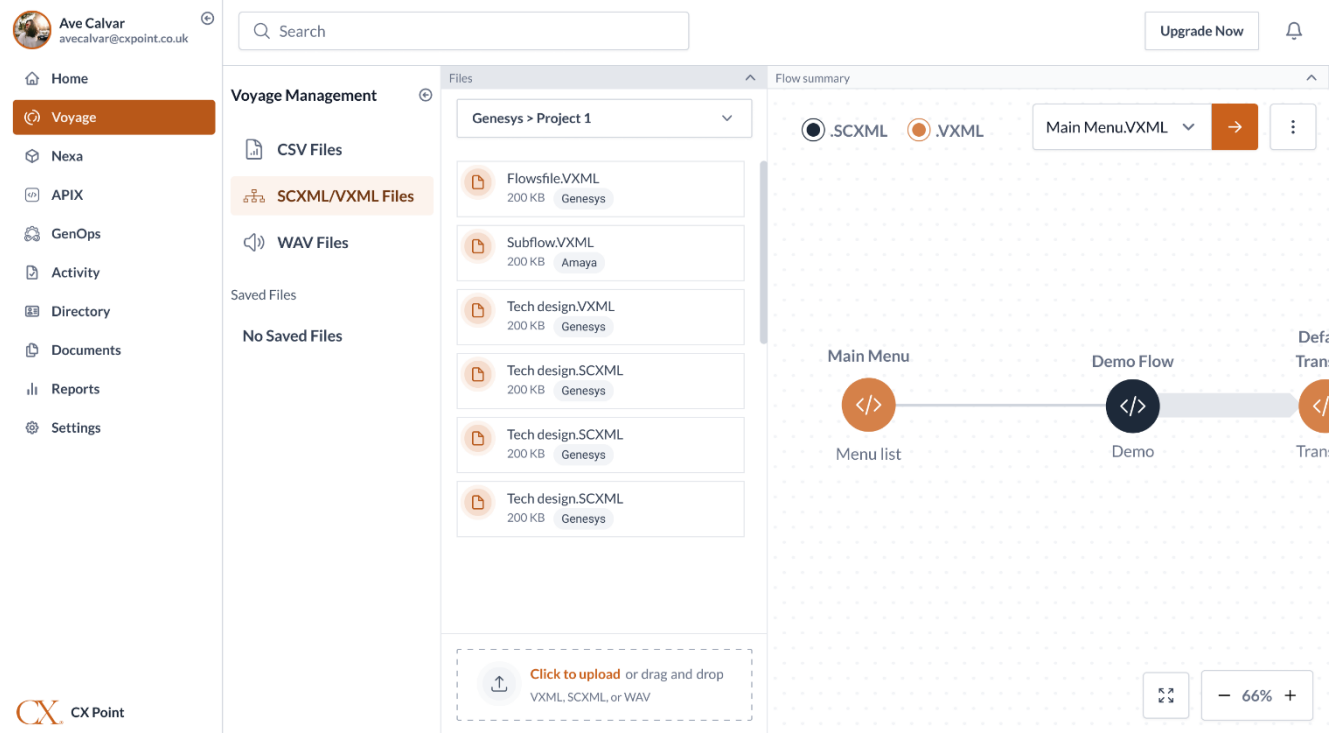

Step 5. Select the Project from selected workspace and click on “Submit” to save the file.

[To go back to list of questions click here](#)

2. Flow Summary & Flow discovery

Step 1. Go to Voyage> Select File from Workspace to view flow summary.

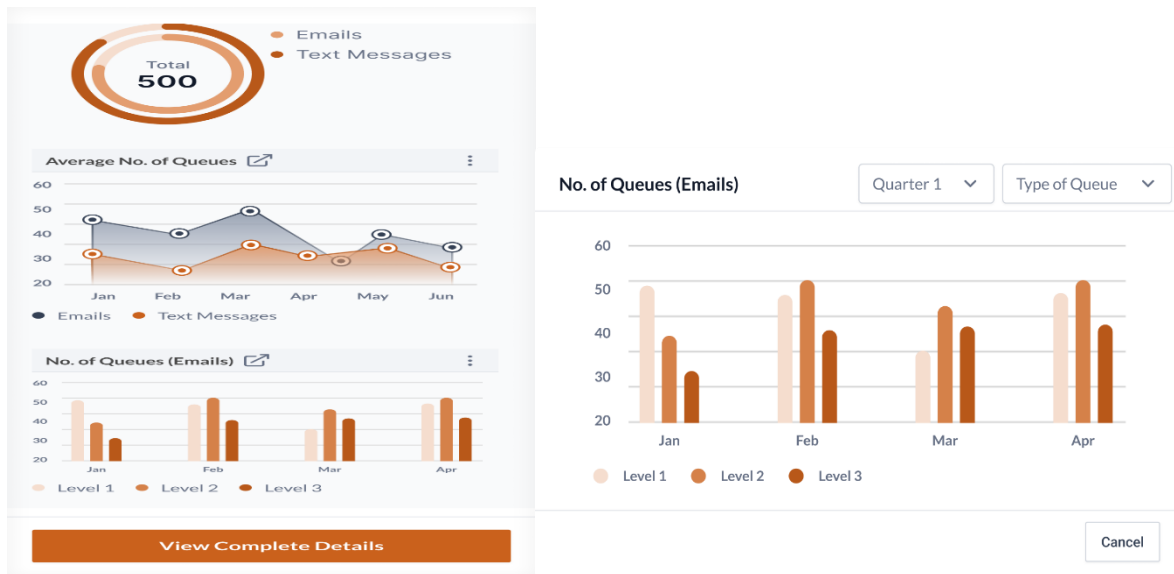

Step 2. Select the category of flow from “Discovery of flows” section.

The screenshot shows the CX Point interface. On the left is a sidebar with navigation links: Home, Voyage (selected), Nexa, APIX, GenOps, Activity, Directory, Documents, Reports, and Settings. The top bar includes a search bar, a user profile for Ave Calvar, and an 'Upgrade Now' button. The main content area is divided into 'Voyage Management' and 'Discovery of Flows'. Under 'Voyage Management', there are sections for 'Files' (with .SCXML and .VXML options) and 'Saved Files' (showing 'No Saved Files'). A 'Main Menu.VXML' file is selected, and a 'Demo Flow' is highlighted. The 'Discovery of Flows' section on the right has a 'Select Category' dropdown with 'Call Flow' and 'Routing Flow' options. Below this is a table with columns 'File Name', 'Previous', and 'Next'. The table lists files like 'Main Menu.VXML', 'Demo Flow.VXML', and 'Default Tr.VXML'. A 'Select File' dropdown is set to 'Default Transfer', and a bar chart shows data for months Jan through Jun. A 'View Complete Details' button is at the bottom right.

Step 3. Select the file from drop down bar > select the object tag from “Select Object tag” to analyze it’s summary.

This screenshot shows the same CX Point interface as the previous one, but with the 'Select Object Tag' dropdown menu open in the 'Discovery of Flows' section. The dropdown menu lists several options: 'Select', 'Users', 'Divisions', 'Roles', and 'Queue'. The 'Queue' option is highlighted with a checkmark, indicating it has been selected. The rest of the interface remains the same, with the 'Main Menu.VXML' file selected and the 'Demo Flow' highlighted.

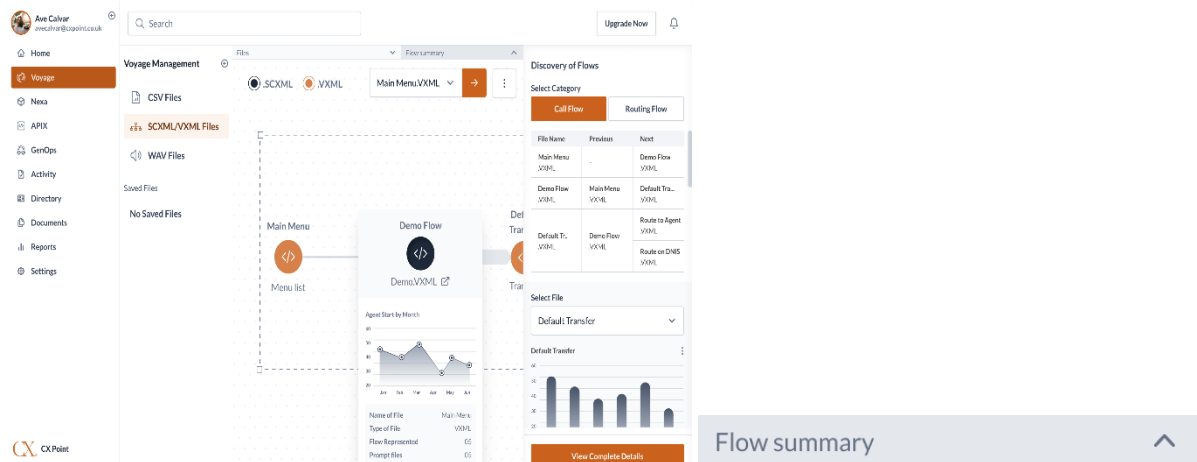

Step 4. Click on “View Complete details” to get the Summary of selected Object tag file.

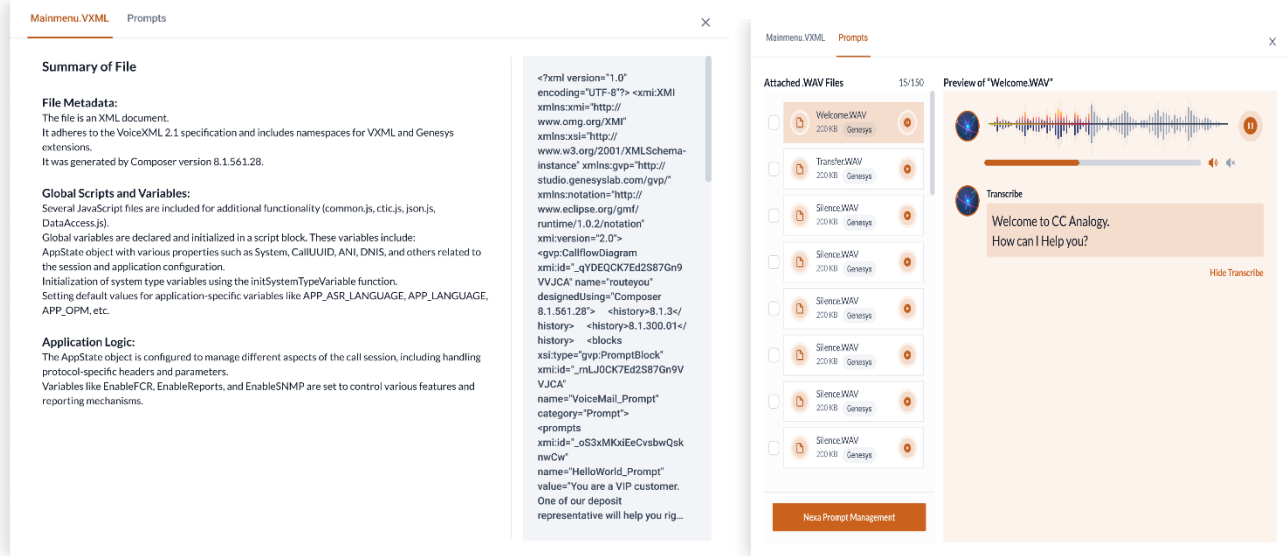

[To go back to list of questions click here](#)

3. Prompts & Transcribe (file meta data, application logic, scripts & variables)

Step 1. Select the file from workspace > click on the “Flow Summary” to view(Meta data ,etc.)

Step 2. Can view summary of file selected > to view Prompts click on option “Prompts”.

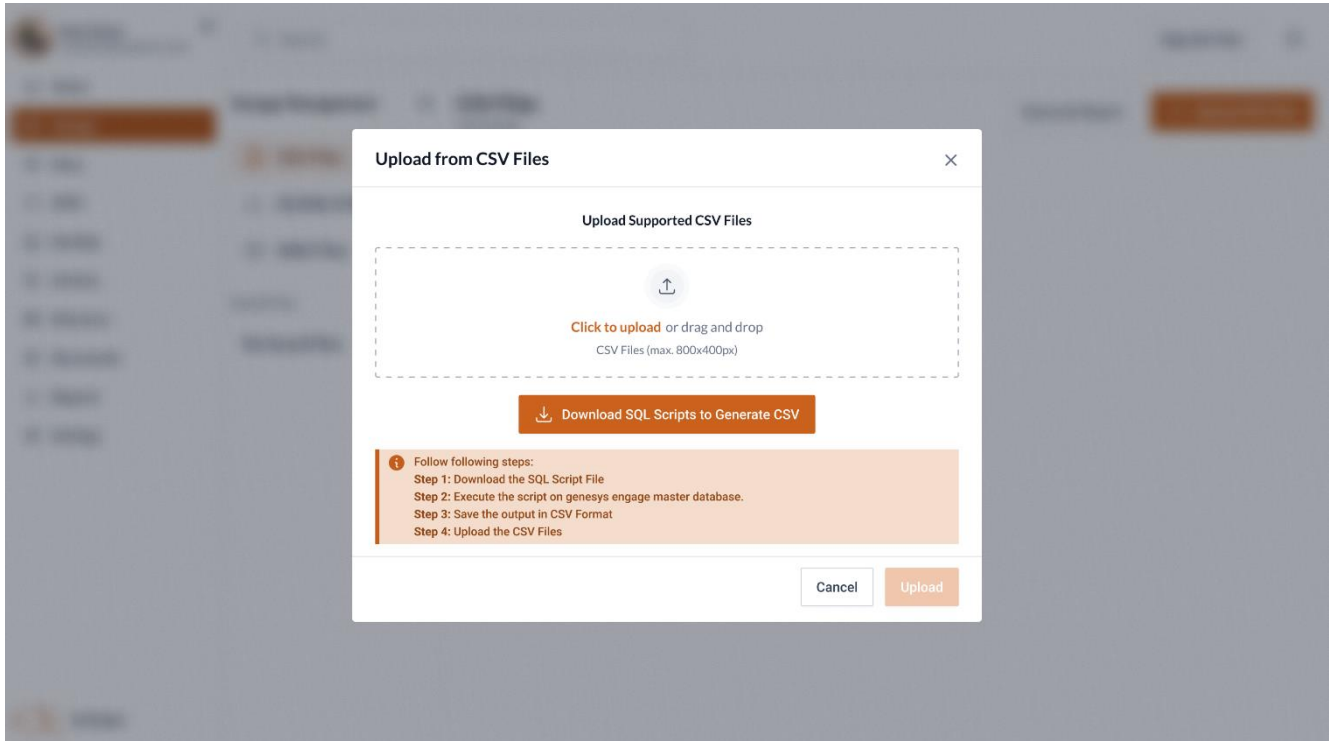

[To go back to list of questions click here](#)

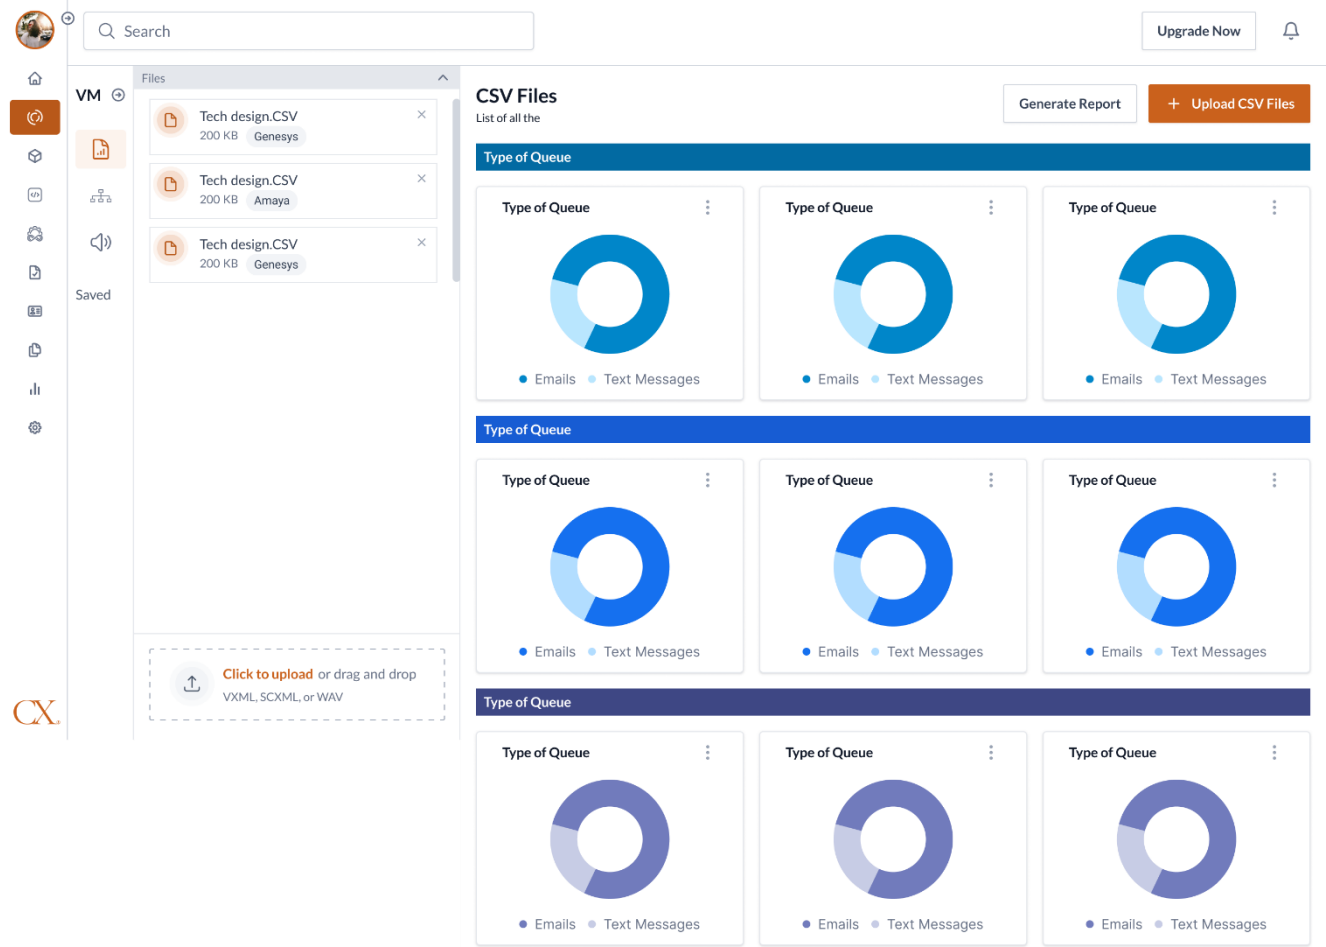

4. How to upload from CSV files

Step 1. Select CSV files option under Voyage Management to select CSV files.

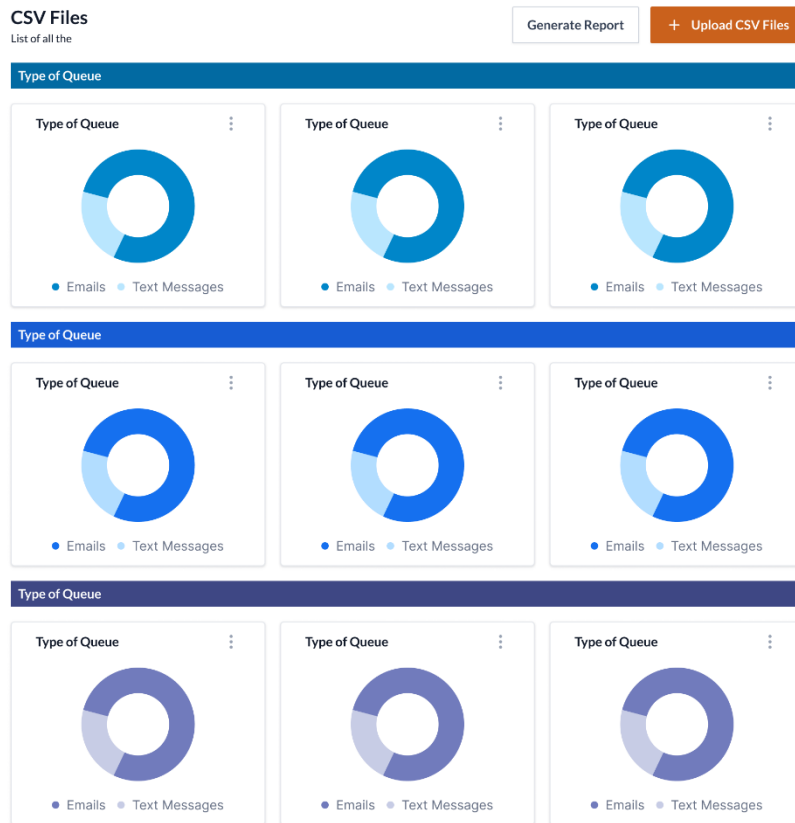

Step 2. Identify the CSV files > Upload the selected file.

Step 3. Selected CSV files is displayed.

Step 4. User can add more CSV files by clicking on “Upload CSV files” and save files into Workspace.

[To go back to list of questions click here](#)

5. Save flow & generate report

Step 1. Goto Voyage management > select the flow category under ‘voyage management’.

Step 2. Select the flow> and click on “Save flow” or click on “generate report” to view report.

Step3. User can also rename the while saving it in files.

Rename Flow

×

Flow name

Flow 1

Cancel

Save

Step 4. User can delete the saved flow by selecting the “Delete flow”.

The screenshot displays the CX Point application interface. On the left, a sidebar menu includes 'Home', 'Voyage' (highlighted), 'Nexa', 'APIX', 'GenOps', 'Activity', 'Directory', 'Documents', 'Reports', and 'Settings'. The main area is titled 'Voyage Management' and contains a 'Files' section with 'CSV Files', 'SCXML/VXML Files', and 'WAV Files'. Under 'Saved Files', 'Flow 1' is listed with a three-dot menu icon. This menu is open, showing 'Rename Flow' and 'Delete Flow' options. Below the file list is an 'Upload From Workspace' button. The right-hand side of the interface shows a 'Flow summary' section with a 'Main Menu' dropdown and a flow diagram. The diagram includes nodes for 'Main Menu' (Menu list), 'Demo Flow' (Demo), and 'Demo Flow' (Tran). A zoom control at the bottom right indicates a zoom level of 66%.

Step 8. Select the prompt that you want to edit or update

[To go back to list of questions click here](#)

2. How to edit prompt?

Step 1. Go to Nexa > Routing > Prompts > Prompt Migrator

Step 2. Select the prompt that you want to edit or update

The screenshot shows the CX Point interface. On the left is a sidebar with a user profile 'Ave Calvar' and a search bar. Below the profile are navigation links: Home, Voyage, Nexa (selected), APIX, GenOps, Activity, Directory, Documents, Reports, and Settings. The main area is titled 'Nexa Management' and contains a 'Routing' section with sub-links: Call Routing, Emergency Groups, Scheduling, and Prompts (selected). The 'Prompts' section shows a summary of 1000 Active, 250 Inactive, and 250 Deleted prompts. Below this is a table of prompts under the 'Prompt Migrator' tab. The table has columns for 'Prompt File', 'Transcription', 'Workspace Tag', and 'Status'. The prompts listed are: Welcome.WAV (Welcome to CX Point. How can I help you?, Genesys, Active_Migra), Silence.WAV (Lorem ipsum dolor sit amet consectetur., Genesys, Active_Migra), Tune.WAV (Lorem ipsum dolor sit amet consectetur., Genesys, Active), Music.WAV (Lorem ipsum dolor sit amet consectetur., Avaya, Active_Migra), Dummy.WAV (Lorem ipsum dolor sit amet consectetur., Avaya, Active_Migra), Text.WAV (Lorem ipsum dolor sit amet consectetur., Genesys, Active), Voice.WAV (Lorem ipsum dolor sit amet consectetur., Genesys, Active), Queue.WAV (Lorem ipsum dolor sit amet consectetur., Avaya, Active), Skill.WAV (Lorem ipsum dolor sit amet consectetur., Genesys, Active_Migra), and Audio.WAV (Lorem ipsum dolor sit amet consectetur., Avaya, Active). At the bottom, it shows 'Showing 10 of 1500 entries' and pagination controls.

Step 3. Update Prompts

[To go back to list of questions click here](#)

3. How to use IVR prompt generator?

Step 1. Go to Nexa > Routing > Prompts > IVR Prompt Generator

Step 2. Fill Details and click on submit

Step 3. Then you'll move toward choose prompt. Write prompt name and text and click on submit.

The screenshot shows the CX Point user interface. On the left is a sidebar with navigation links: Home, Voyage, Nexa (highlighted), APIX, GenOps, Activity, Directory, Documents, Reports, and Settings. The top header includes a search bar, an 'Upgrade Now' button, and a notification bell. The main content area is titled 'IVR Prompt Generator' and shows a progress bar with 'Fill Details' (completed) and 'Create Prompt' (current step). Below the progress bar, the title 'IVR Prompt Generator' is followed by the instruction 'Please write prompt text.' There are two dropdown menus: 'Prompt Name' and 'Prompt Text Below or Select From Suggestions'. To the right, under 'AI Suggestions', there are five identical suggestions: 'Can you please provide your account number or username so I can look into your issue?'. At the bottom, there are 'Back', 'Cancel', and 'Submit' buttons.

Your prompt is created.
